Hosted by the National Center for State Courts (NCSC), this site includes links to all available state courts and other resources. The NCSC,

<http://www.ncsconline.org/>, began in 1971 after Chief Justice Warren Burger

called for the creation of a central resource for the state courts—a "national center

for state courts." Its original purpose was to serve as an information clearinghouse so that innovations in one court can benefit all courts.

The GCAC site provides the appropriate case reporting forms in PDF format; the forms can be filled out online and printed. The information contained in the filed civil case reporting forms provides the Georgia courts with a database of civil actions for case profiles, workload distribution, case counts, and tort data. The site also includes information about systems for criminal case information, jury management, magistrate court fees & fines, and traffic court management.

Georgia Probate Court Information System - <http://www.gaprobate.org/main.html>

The compiled rules are available in electronic format and published on the Web. Keep in mind that the updating of the Web-published rules is the responsibility of the filing agency.
