
Irish family law presents an intriguing blend of old and new for the delectation of the comparative scholar. Divorce is constitutionally prohibited¹ and grounds for annulment² and separation³ are restrictive; yet sex discrimination has been held to offend the Constitution;⁴ the right of marital privacy has been recognized in relation to contraception,⁵ and support obligations⁶ and custody rights⁷ have been rendered sex neutral. The Irish

² Recent decisions involving duress, fraud, and impotence, however, have evinced a permissible tendency to break with old approaches. See B. v. D. (High Ct., Murnaghan, J. 1974 (unreported)), K. v. K. (High Ct., Kenny, J. 1971 (unreported)), and S. v. S. (Sup. Ct. 1976 (unreported)); O'Reilly, Fraud, Duress and Nullity, 8 I.R. JURIST (NEW SERIES) 362 (1972); Binchy, Impotence, Fraud and Nullity of Marriage: An Irish Restatement, 51 LAW & JUSTICE 778 (1978). Significant changes in the grounds for, and effects of, annulment were proposed in a discussion paper, The Law of Nullity in Ireland (Prl. 5628, August 1976). The Law Reform Commission is at present studying the law of nullity with a view to its reform.

Supreme Court has, moreover, evinced considerable interest in constitutional developments in the United States in these areas.4

Until the publication of Family Law in the Republic of Ireland,9 no textbook existed which analysed these developments. This gap has now been filled with remarkable skill by a young Irish lawyer who has considerable experience in practical aspects of the subject through his work with Free Legal Aid Centres. The book extends over sixteen chapters, adopting the somewhat conservative structure favoured by the leading English texts.10 If, however, the structure is conservative, the content is far from being so; the author displays no reluctance to express his criticisms of what he perceives as deficiencies in the law and to make suggestions regarding possible reforms.

The standard of research of Irish materials cannot be faulted. Almost all relevant decisions,11 legislative provisions, and academic commentaries are included. Reference is also made to English and some Commonwealth sources, but a major deficiency is the paucity of reference to United States jurisprudence, particularly since this, as mentioned, has been of such influence in the development of Irish constitutional law in this area.12

It is, however, the standard of analysis that is the most impressive feature of the work. It displays a maturity and depth which are astonishing for a person as young as the author (26 years). The manner of expression is, moreover, crystal clear. Whether or not one agrees with the author, there is no doubt regarding what he intends to say.

One might disagree with certain points of emphasis in the book. One would almost certainly take issue with at least some of the criticisms of the law and arguments for reform. Nevertheless, one's overall response must be one of considerable gratitude to the author for having produced, not only for Irish lawyers, but also for all those interested in comparative aspects of family law, a textbook of such depth and maturity.

11 Research into Irish decisions on family law (and, indeed, other subjects) is a somewhat daunting experience since a large number of decisions are not reported and those that are reported do not appear in print for a considerable time after being handed down.
12 One would, for example, have expected some reference to United States decisions and academic commentary in relation to abortion and sex discrimination. In fact, abortion is not discussed at all in the book; cf. O'Reilly, supra note 5 and Binchy, Marital Privacy and Family Law: A Reply to Mr. O'Reilly, 65 St. Trum. 330 (1977).
